

GEORGIA LEFT ME OUT

“Not having health insurance makes you feel like a 3rd rate citizen. When I had health insurance, I felt like a 1st rate citizen.”

Henry from Savannah, GA

Henry had to stop working as a truck driver in 2008 to take care of his diabetes and other health issues. He intended to return to driving once his health problems were under control, but he was diagnosed with thyroid cancer and could not return to work. He is currently managing the cancer and diabetes along with several other severe health issues, including blood clots in his legs and lungs, and COPD. Although, he is able to get some of his care from a free clinic in Savannah, he has many unpaid medical bills. He must rely on his elderly mother to help pay some of his costs, which he says is difficult because she lives on a fixed income.

I fall in the coverage gap too.

Henry's voice matters. So does mine. We support closing Georgia's coverage gap because:

I do not wish to receive action alerts about Georgia's health care issues, including efforts to close the coverage gap.
